Pompeo Bans Funding for BDS Groups as Antisemitic

In a galling act of pandering to our greatest ally, the State Department has now banned funding for groups that participate in the BDS movement, a Palestinian lead movement to boycott and sanction Israel for its human rights violations. Many international and human rights groups have criticized the apartheid nature of the Israeli state, as well its imperialism, foreign lobbying and militarism towards Palestinians. One could of course quibble with the BDS movement or with Israel, but one cannot defend the idea of punishing America businesses who exercise their right to do work with groups they support. This proves that America First really means Israel First and capitalism is in the service of the powerful. We are always told that criticism of Israel is not antisemitic, only be to told that acting on that criticism is antisemitic. The BDS movement responded to the alliance between Trump and Netanyahu as fanaticism of the highest order; and they're not wrong.
